

CONDUCT TELESCOPIC MATERIALS HANDLER OPERATIONS RIIHAN309E

COURSE OUTLINE

This nationally accredited telescopic materials handler operations course is designed for those in the resources and infrastructure industries. It includes teaching learners how to plan and prepare; conduct machine pre-operational checks; operate the telescopic materials handler; attach, secure, lift, carry and place materials; select, remove and fit attachments; relocate the telescopic materials handler; carry out machine operator maintenance; and clean up.

ENTRY REQUIREMENTS

Basic verbal and written English communication skills sufficient to read material and understand instruction. Where necessary theory assessment can be answered verbally.

HOW LONG WILL TRAINING TAKE?

Typically the training and assessment is competency-based and is a 1 day course.

Please Note-Total time is dependent on competency of each individual.

HOW IS THE TRAINING DELIVERED?

Training and assessment is both practical and theory based and delivery.

FULL COURSE TRAINING- Practical and theory training based on theory concepts and set tasks that need to be completed. The learner is then given a theory and a practical assessment. Designed for all types of learners giving them access to the equipment and skills required to be competent in the practical skills

and knowledge of working at heights in a very focused one on one environment.

Step 1-Completion of theory training and equipment familiarization

Step 2- Learner completes practical training in a structured learning environment in a small group.

Step 3- Learner completes a final theory and practical based assessment and is issued a Statement of attainment and a proof of training card.
